

Automatically improves the quality of scanned images, dramatically improving both scanning productivity and capture efficiency.

Kofax VRS (VirtualReScan) improves scanning productivity by reducing the time involved in manual document preparation and automatically enhancing the quality of scanned images.

Before Kofax VRS, document scanning often resulted in unclear, skewed and downright unreadable images, leading to time-consuming and costly rescans of the original documents. Today, Kofax VRS literally cleans scanned images, which improves the accuracy of optical character recognition (OCR) and handwriting recognition (ICR) software, reduces file sizes, and minimizes document preparation tasks and manual activities that cost your organization time and money.

- **Reduce document preparation.** Just yank out the staples and paper clips, stick your documents in the feeder and press the scan button. No experience necessary.
- **Capture color on demand without changing scanner settings.** No sorting out black and white documents. No inserting separator pages. Kofax VRS automatically determines how to handle your color documents at the rated speed of the scanner.
- **Make piles of paper disappear in the blink of an eye.** Fewer manual tasks and less operator intervention means faster scanning and processing.
- **Produce the perfect image the first time, every time.** Say goodbye to rescanning. Kofax VRS automatically corrects images for you and also provides simple tools to make quick repairs without ever touching the original document.

### Which Way is Up? It Doesn't Really Matter

Don't waste time turning all your documents to the same orientation before scanning. Kofax VRS Professional automatically analyzes the content of each scanned document and corrects the image orientation on the fly, even when scanning in duplex mode. Feed a document upside-down. Or reversed. Skewed or rotated 90 degrees. It doesn't really matter. Kofax VRS Professional correctly orients the image.

## Blank Pages No Longer Lead to Blank Stares

Is that page blank? Is there content? Or is the content really bleed-through from the other side of the page? Kofax VRS Professional has the answer, so scanner operators no longer need to evaluate blank pages for possible content. This reduces the costs associated with storing blank pages and the challenges that result from introducing blank pages into the document workflow. Kofax VRS also minimizes the risk that a page with very little content is mistaken for a blank page.

## Even the Toughest Documents are No Match for Kofax VRS

It used to be almost impossible to successfully scan a document with a complicated, textured background, such as graph paper, blueprints and security paper. But the Advanced Clarity feature in Kofax VRS Professional offers an additional image quality option to process even the most challenging documents. Advanced Clarity allows users to easily scan a wider variety of documents, reducing document preparation and maximizing scanning time.

## Capture Color on Your Terms

Is capturing color important to your business? Kofax VRS can sniff out the color documents from the black and white ones without changes to the scanner settings or any other manual intervention. Forget about using separator sheets or patch codes to separate color from black and white documents within a batch.

## Sometimes a Little Color Goes a Long Way

Small amounts of color – such as date stamps, highlights or logos – are no problem for Kofax VRS. Kofax VRS Professional ensures that these small but important bits of color are preserved in the scanned image, helping to maintain the integrity of the original document.

## About Kofax

Kofax plc (LSE: KFX) is the leading provider of document driven business process automation solutions. For more than 20 years, Kofax has provided award winning solutions that streamline the flow of information throughout an organization by managing the capture, transformation and exchange of business critical information arising in paper, fax and electronic formats in a more accurate, timely and cost effective manner. These solutions provide a rapid return on investment to thousands of customers in financial services, government, business process outsourcing, healthcare, supply chain and other markets.

Kofax delivers these solutions through its own sales and service organizations, and a global network of more than 1000 authorized partners in more than 60 countries throughout the Americas, EMEA and Asia Pacific.
