

Kofax Capture Export Connector for SAP (KCEC-ERP) provides two-way integration between Kofax Capture and SAP NetWeaver for invoice processing and AP automation applications. This connector allows the release of images and index data into SAP. Documents can be released through the use of barcode matching or through the use of numerous transactions within SAP. Kofax MarkView for Accounts Payable and KCEC-ERP are fully certified as SAP NetWeaver applications, which guarantees complete interoperability with SAP Financials.

With this connector, Kofax Capture customers can take advantage of the tight integration Kofax offers to SAP NetWeaver. Kofax MarkView's real-time SAP ERP integration supports AP best practices, treating SAP as the single source of truth and providing complete visibility from the point of invoice capture through time of payment. Kofax MarkView also allows for the line-of-business user to easily approve and appropriately code an invoice for processing without the need to learn or use SAP Financials to view and approve invoices. Business users do not need an SAP user license. With Kofax MarkView AP Advisor, finance executives gain actionable intelligence about their department's performance by viewing both real time process and ERP data in a graphical interface. Executives can resolve operational performance issues directly from the product's dashboard; set KPIs and alerts that track payment status, cycle times and productivity and quality goals; and take immediate action on invoices with soon-to-expire discounts to ensure optimized cash management.

Kofax Capture Export Connector - ERP

SAP Certified

Kofax Capture Export Connector-ERP is SAP integration certified and uses the SAP Netweaver Application Server, ensuring support for both SAP R/3 and mySAP 2004 and 2005.
