

Kofax Ascent Xtrata End of Life Announcement

Kofax Ascent Xtrata was released in 2004 as a custom module for Kofax Capture and Ascent Capture products providing layout classification, zone registration and easier form setup capabilities. Kofax Ascent Xtrata is a no charge add-on to Kofax Capture and is included on the shipping media for Kofax Capture 8 and 9. With the release of Kofax Capture 10 later this year, Kofax will no longer include or support Kofax Ascent Xtrata with Kofax Capture 10.

Customers using Kofax Ascent Xtrata with Kofax Capture 8 or 9 can continue to receive support on those versions of Kofax Capture as long as those products are still supported by Kofax in accordance with the Kofax Product Life Cycle policy.

It should be noted that Kofax has stopped development on Kofax Ascent Xtrata and will no longer be adding any new features, updating support for new operating systems or providing any maintenance releases of Kofax Ascent Xtrata going forward.

Mitigation

Kofax includes the capabilities of Kofax Ascent Xtrata in the Kofax Transformation Modules product. Customers utilizing Kofax Ascent Xtrata should contact their Kofax representative or partner to discuss upgrading to Kofax Transformation Modules as part of their Kofax Capture 10 upgrade planning.

Questions

If you have any questions or require additional information, please do not hesitate to contact your Kofax representative, partner, or email info@kofax.com.
