

# 100 Automation Opportunities Across the Enterprise

**Robotic process automation (RPA)** is a transformational technology that can automate tasks and processes across the business from finance and accounting to customer service. Not only can you implement RPA right on top of your core business systems and realize ROI almost immediately, but its use cases across the company are practically endless.

**When automation opportunities are everywhere**, where should you start? Whether you're looking for ideas to prioritize your RPA projects or you need to get buy-in from additional departments for an enterprise-wide RPA build-out, use this handy **RPA One-Sheet** with 10 example use cases across 10 business units for inspiration.

Sales and Marketing	Customer Onboarding	Customer Service	Operations/ Compliance/Legal	Finance and Accounting	Human Resources	Information Technology	Supply Chain	External-Vendors and Partners	Cross-Function
