Intelligent Automation
The Connective Tissue for Digital Transformation

As the global digital economy surges, new connections are being forged between people, processes and technologies. The result is the world’s most powerful “total” workforce comprising digital workers and human talent. This workforce is an agile, digital workforce of attended and unattended software robots, policies & systems working in coordination to create operational efficiency, drive profitable growth and improve customer experience and satisfaction across the enterprise. Intelligent Automation effectively captures, automates and integrates the collective power of artificial intelligence (AI), robotic process automation (RPA), mobile technologies and other Intelligent Automation solutions to transform information-intensive business processes, reduce manual work and errors, and improve operational productivity and performance at scale.

Why Kofax Intelligent Automation?
Kofax Intelligent Automation applies artificial intelligence (AI), robotic process automation (RPA) and other digital technologies to transform information-intensive business processes, reduce manual work and errors, and improve operational productivity and performance at scale. Organizations that work like tomorrow use artificial intelligence (AI), robotic process automation (RPA), mobile technologies and other Intelligent Automation solutions to create operational efficiency, drive profitable growth and improve customer experience and satisfaction across the enterprise. Intelligent Automation effectively captures, automates and integrates the collective power of artificial intelligence (AI), robotic process automation (RPA), mobile technologies and other Intelligent Automation solutions to transform information-intensive business processes, reduce manual work and errors, and improve operational productivity and performance at scale.

Kofax Intelligent Automation vs. the Competition
