

Recruit a Digital Workforce

for Procure-to-Pay-Processes

1 Figure Robotic Process Automation in Your Financial Future

Trends that will have the greatest impact on Procure-to-Pay (P2P) in the next decade include: Digitalization of B2B connections and transactions (75%), predictive analytics and forecasting tools (59%) and process ownership and link to procurement (57%)¹

2 Select the Right Opportunities for Automation

Break down the P2P process into a series of specific tasks to create a use-case development map:

- Supplier Data Management**
- Request & Purchase Ordering**
- Receiving Goods & Services**
- Accounts Payable**
- Travel & Expense²**

Consider the characteristics of the P2P, such as data extraction, data enrichment and validation.

Key Questions to Ask About Your P2P Process:

- Is the task repeatable?
- Can you integrate multiple screens or self-service?
- Can you automate approvals?
- Is it easy to update records?

If you answered yes, they are all good candidates for implementing robotic process automation.

3 A Weighty Matter: Assessing the Costs and Benefits of Robotic Process Automation

The Hackett Group's analysis of RPA imply a number of critical success factors for RPA deployments. These are based on evaluation criteria for potential uses of RPA.¹

4 The Bottom Line: Making Dollars & Sense with Rpa

Expected benefits for P2P organizations with RPA include 65% increased operational production, 52% reduction in process costs and 48% in increased data quality and accuracy.¹

RPA by the Numbers

- 6–8 Weeks**
it takes to develop and deploy RPA solution¹
- 20–30%**
Labor cost savings¹
- 24/7 | 365**
Round the clock monitoring¹ & productivity
- 100%**
Data accuracy
- \$80,000**
In savings resulting from moving from a full-time employee to a robot

With Business in Fast Forward...

you must accurately interpret the signs to successfully improve productivity and manage costs. For successful process transformation of procure-to-pay and streamlined financial processes, all roads lead to Robotic Process Automation. It's not a matter of "if" but "when."

Ready to Eliminate the "Manually Mundane" and Banish the "Stare and Compare" in Your P2P Process?
