

Kofax PSIcapture: Smart Data Capture *and* Extraction

PSIcapture streamlines your workflows by ingesting paperwork in any form, accurately extracting the information, and moving it to the electronic filing system you already use.

Work the Way You Want with PSIcapture

Secure. Scalable. Automatic.

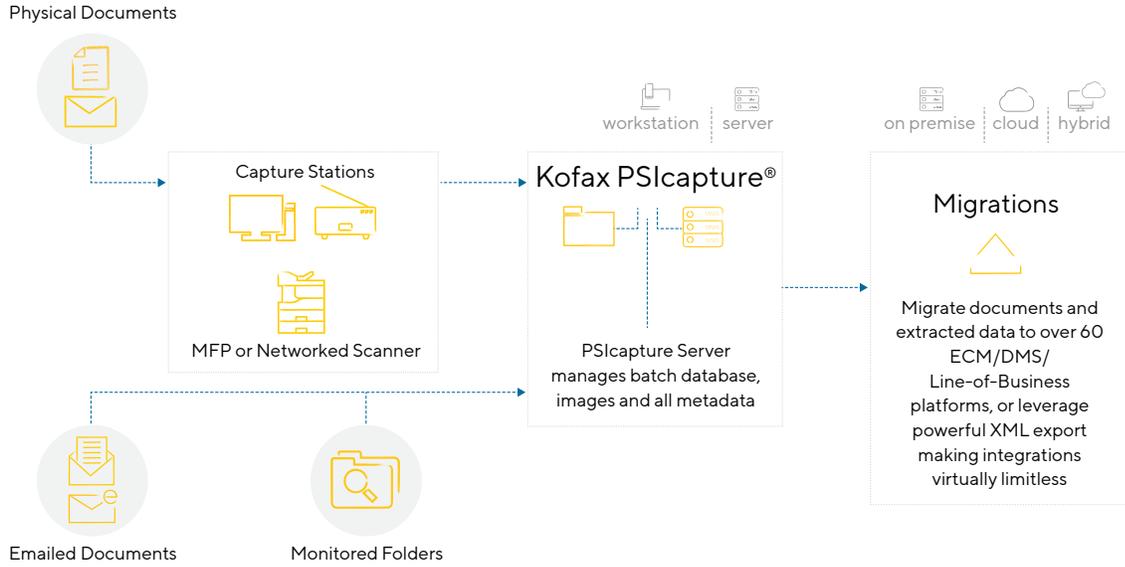

Kofax PSIcapture allows you to effortlessly intake documents and files with scanners, copiers, monitored folders, other databases and IMAP email folders. Auto-importing provides a no-touch solution so you don't have to lift a finger.

The solution reads and extracts information from sources like electronic type, handwriting or metadata, checking the data against a database for verification. PSIcapture is fast and scalable, capable of handling even the most demanding workloads.

KOFAX

PRODUCT SUMMARY

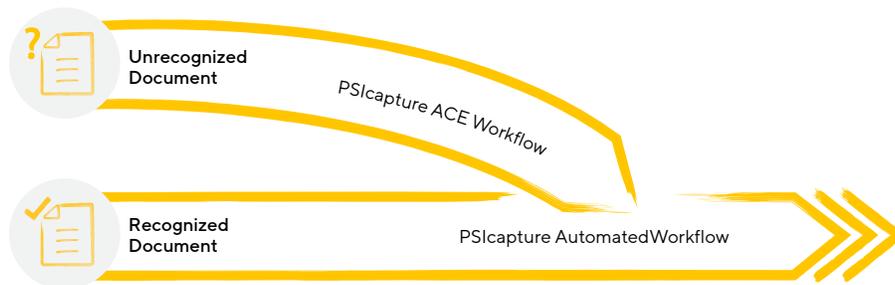

Work Smarter With the Accelerated Classification Engine

Your data stays organized with with PS/capture's Accelerated Classification Engine (ACE), an automatic document identification feature that allows users to build Classification rules in the middle of a workflow without breaking stride.

ACE makes life easier by allowing knowledge workers to manage global algorithms for Classification rule creation, or dynamically classify documents imported during the workflow.

Taking it a step further, ACE may be scheduled to synchronize with other databases to allow organizations to keep classification rules in synch with the ever-changing business operations. With ACE, users can choose to simply validate the Classification and Data Extraction that the system has intelligently identified, reducing a process that once took hours to under a minute.

PRODUCT SUMMARY

Let the Workflow Do the Work

After capturing data from a variety of sources and employing powerful OCR, data extraction and document identification, digital workflow transformation becomes the natural result. Processes are completed in a fraction of the time, boosting productivity and saving valuable resources.

Information Just Waiting to be Discovered.

Your documents are actionable business intelligence. Harness it with PScapture.

Data Where You Need It

With numerous ECM and file/folder types to choose from, integrating into your office ecosystem is easy. Our solutions move files to ECMs like Microsoft SharePoint, DocuWare, OnBase and many others. Or if you simply need it put into a folder on your company server, you can do that too.

Selected Features

PSIcapture offers a number of features to enhance and accelerate important business data processing for companies needing more complex workflows. These powerhouse features include:

Multi-Core OCR

With our High-Performance OCR, you can use up to 16 cores for OCR capability. So high volume users can realize text reading boosts up to 12X normal when OCR is utilized in a workflow.

Classification

Never again separate your documents before scanning. PSIcapture can be trained to automatically identify and separate documents, negating the need for pre-scan separation.

eMail Capture

Automatically ingest, process and migrate emails to any number of final destinations. Easy to set up for administrators and no end-user training required.

Table Extraction

Teach PSIcapture to extract each row or column in a table as an individual record and post it to any number of places, including a database or an accounting system.

Mailroom

Our HTML5-friendly, team-driven Indexing and Quality Assurance solution, Mailroom, connects large teams with assets on the go, ensuring documents get processed quickly and easily.

Software & Hardware Requirements
