“The Kofax implementation has revolutionized workflow within Goldsmith Williams, resulting in significant service level improvements and productivity, providing our clients with a transparent view of the status of their case and a choice as to how and when we communicate with them.”
– Maria Rodman, Head of Administration & Compliance, Goldsmith Williams

Goldsmith Williams Solicitors is one of the UK’s leading law firms, specializing in conveyancing, remortgaging, road traffic accidents and wills. With 25 years experience, the firm is based in the heart of Liverpool and employs more than 240 staff members. Goldsmith Williams is on the panel of every leading building society, bank and centralized lender, and acts for a wide network of mortgage advisers, packagers, networks and accident claims companies.

Goldsmith Williams Solicitors Selects Kofax Solution to Automate the Processing of 1.6 Million Legal Documents per Year

New Business Process Automation solution results in savings of more than £500k in the first full year following implementation

The Challenge
Traditionally, legal firms deal with thousands of paper documents. GWS is no exception on that score. On a daily basis, so many personal injury claims, court documents, conveyancing documents and loan agreements hit the desks of Goldsmith’s officials. Maria Rodman, Head of Administration & Compliance at Goldsmith, knows firsthand of the problems caused by relying on information hidden in unorganized piles of paper.

“Goldsmith Williams receives more than 8500 pages of mail per day. It’s nearly impossible to manually process this deluge of highly sensitive paperwork in an accurate, cost-effective and timely manner,” Rodman explained. “The tedious sorting, internal distribution, data entry and, once stored, retrieval of important client documents negatively impacted each employees productivity. Due to this unacceptable situation, we decided to look for a robust business process automation solution that was capable of managing our enterprise’s different document types while maintaining the highest standard of quick turnaround time and that would improve our service level agreements to keep our competitive edge.”

The Solution
Goldsmith Williams’ criteria checklist for the potential new solution was detailed and comprehensive. After scanning, the solution should reliably classify all documents, automatically extract relevant data and then index it to the correct case reference. The solution should ensure proper mail categorization to enable prioritization and allow a seamless electronic flow of information both internally and externally. It should vastly avoid any manual engagement, should easily fit into the existing SQL backend infrastructure and should overall improve space, auditing, efficiency and business continuity.
The law firm started an extensive market research in order to identify the best available market offer and finally concluded that Kofax document driven business process automation solutions would be the perfect fit. Goldsmith Williams turned to Capital Capture, a certified Kofax Solution Provider. Capital Capture developed and implemented an automated processing solution based on Kofax Capture™, the world’s leading capture platform for automating document driven business processes and Kofax Transformation Modules™, which streamline the transformation of business documents into structured electronic information by automating the processes of document classification and data extraction.

Tailored around customer specific workflows implemented by Capital Capture, the new solution went live after a successfully completed pilot phase and revolutionized Goldsmith Williams’ operational procedures. The Kofax solution, using powerful learn-by-example artificial intelligence to teach itself document classification and extraction, captures all incoming documents as soon as they enter the organization. The extracted data then gets categorized, prioritized and released to the firms case management system and in parallel to Goldsmith Williams’ central repository and can be accessed from each desk within seconds. By linking into Goldsmith Williams “GWLive” portal, the solution also grants the firm’s clients a 24/7 real-time access to the current status of their individual cases.

The Results
The implementation of the new BPA-solution at Goldsmith Williams demonstrates the manifold benefits of Kofax’s information capture technology in high-volume capture environments.

“The overall benefits and productivity savings yielded by the new solution are even higher than expected,” Rodman concludes. “The implementation has revolutionized workflow within Goldsmith Williams, resulting in significant service level improvements and productivity, providing our clients with a transparent view of the status of their case and a choice as to how and when we communicate with them. Our clients have assurances that even in the event of a disaster, Goldsmith Williams can continue to function with minimum disruption. Paper and consumable use has decreased substantially, which in turn leads to cost savings not to mention a greener Goldsmith Williams. The ROI was realized after just nine months, resulting in savings of just over £500k in the first full year following implementation.”

About Kofax
Kofax® plc (LSE: KFX) is a leading provider of innovative smart capture and process automation software and solutions for the business critical First Mile™ of customer interactions. These begin with an organization’s systems of engagement, which generate real time, information intensive communications from customers, and provide an essential connection to their systems of record, which are typically large scale, rigid enterprise applications and repositories not easily adapted to more contemporary technology. Success in the First Mile can dramatically improve an organization’s customer experience and greatly reduce operating costs, thus driving increased competitiveness, growth and profitability. Kofax software and solutions provide a rapid return on investment to more than 20,000 customers in financial services, insurance, government, healthcare, business process outsourcing and other markets. Kofax delivers these through its own sales and service organization, and a global network of more than 800 authorized partners in more than 75 countries throughout the Americas, EMEA and Asia Pacific.
